

# MINES<sup>®</sup> FORMULA

**SPONSORSHIP INFORMATION**

**WHO WE ARE**

**Mines Formula SAE is Colorado's premier collegiate Formula SAE team.**

A top formula team in the United States, Mines Formula gives engineering students hands-on project experience with all elements of the car, from building carbon fiber wings to tuning the Honda CBR 600 RR engine. Based in Golden, Colorado, the team has access to Colorado School of Mines' world-class facilities making us competitive against other top universities in the country.

**ACHIEVEMENTS**

2019	2021	2022	2024	2025
<b><i>44th Place</i></b>	<b><i>27th Place</i></b>	<b><i>25th Place</i></b>	<b><i>52nd Place</i></b>	<b><i>34th Place</i></b>
FSAE Lincoln	FSAE Las Vegas	FSAE Michigan	FSAE Michigan	FSAE Michigan
26th Autocross	7th Autocross	11th Design	20th Efficiency	23rd Endurance

**Last year, we finished all events, and continued to make improvements to the car's technical package.**

Any company that sponsors Mines Formula will receive visibility at a local and national level, because our team is frequently featured online and in media publications. Many of our team members have completed successful internships or are employed with companies that sponsor our team. This means sponsors have first pick of a plethora of eager young engineers with real-world experience virtually unparalleled by any other Mines organizations. For component suppliers, the car serves as an impressive engineering demonstration that will be seen by the nation.

# THE COMPETITION

## Technical Inspection

Our competitions begins with technical inspection, in which a panel of judges ensures the car complies with all Formula SAE regulations, and is safe to drive. This event is pass/fail and does not contribute to the up to 1000 points that a team can earn throughout the whole competition. Mines Formula has passed technical inspection for every car we have produced.

## Design Judging

Design judging involves a thesis style defense of our engineering decisions in front of a panel of industry professionals. Each team subsystem, such as power-train, suspension, or electrical, must present its designs to the judges and respond to their critiques.

## Endurance

The highlight of our competition is the endurance race. Our track is 22 kilometers long, with 80 turns every 2.2 kilometer lap. Since our cars are designed to be as light as possible, it is very difficult to maintain the integrity of the car over the 22 kilometers, which is why the endurance event has a 66% failure rate. This makes it even more notable that MF12 finished 23<sup>rd</sup> in the last competition. Our previous car MF9 also finished endurance successfully.

# SPONSORSHIP BENEFITS

## TALENT

Mines Formula provides a highly unique opportunity for members to receive technical training and practice complex engineering skills in a highly competitive environment. Our team members have experience leading engineering project teams, managing budgets, teaching new members, and adapting to unexpected conditions. We also have experience with tools and software that many other students either are never taught or are not taught until their junior and senior years. As a sponsor, you would have access to the resumes of some of the most accomplished students at Mines.

## VISIBILITY

Our car is often seen at on-campus events, in Golden, as well as at the national competition. Your company will be prioritized by our members and the Mines Formula community including all participants of the collegiate FSAE competition.

## SPONSORSHIP BENEFITS

BENEFITS	Bronze Tier	Silver Tier	Gold Tier	Platinum Tier
	\$500—\$1499	\$1500—\$4,999	\$5,000—\$9,999	\$10,000+
